November 9, 1982

TO: ALL AMC/JEEP DEALERS

SUBJECT: AMC COMPUTERIZED EMISSION CONTROL (CEC) FUEL FEEDBACK (FFB) SYSTEM TESTER ET-501

The ET-501 tester is presently limited to testing the fuel feedback system on 1981 six-cylinder AMC vehicles. The programing required to upgrade the tester to include all six-cylinder 1981 through 1983 AMC and Jeep vehicles equipped with the AMC Computerized Emission Control System, is now complete and tester rework can commence immediately. This rework requires the addition of new programmed chips, harnesses with adaptors, a new operator's manual and storage box.

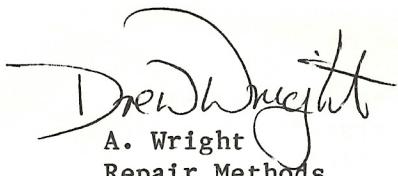

REWORK PROGRAM DETAILS

- All AMC/Jeep dealers who have purchased an ET-501 will receive a "Postage Prepaid - Preaddressed" shipping container from the Owatonna Tool Co. with our letter of instruction for the return of your ET-501 FFB tester to Owatonna. Concurrently, your Parts Account will be debited \$270.00 for reprogramming and upgrading.
- The Owatonna Tool Co. (O.T.C.) will:
 - Identify your tester to ensure that each unit is returned to the same dealer from whom it was received.
 - Reprogram the tester.
 - Supply additional required cables with adaptors, new storage box and new operator's manual.
 - Test each unit, place a 1981-1983 decal over the battey compartment and return the tester.
- Any tester requiring repairs (not exceeding \$20.00) in addition to scheduled reprogramming will be repaired and the cost debited to your Parts Account. If your tester needs repairs exceeding \$20.00 you will be given an estimate of the repair cost.
- Testers with the 1981-1983 decal in place will be warranted for one year from date of shipment.

NEW TESTER SHIPMENTS:

The ET-501 tester is now an essential tool for all AMC/Jeep dealers, any dealer who has not previously purchased the tester will be shipped a new unused 1981-1983 CEC-FFB tester and we will debit your Parts Account for \$549.50. The testers are warranted for one year from date of shipment.

If you have any questions or require further assistance, please contact your Zone Service Department.

December 20, 1982

TO: ALL AMC/JEEP DEALERS

SUBJECT: AMC COMPUTERIZED EMISSION CONTROL (CEC) FUEL FEEDBACK (FFB) SYSTEM
TESTER ET-501.

Further to the letter dated November 9, 1982, (copy attached) return at your earliest convenience (using the accompanying Preaddressed shipping container) your entire ET-501 CEC FFB tester. Pack the tester in the original storage box, along with the operator's manual and all cables, for shipment to the Owatonna Tool Co. for a complete repograming and update.

Depending on your locale, your tester should be returned to you within seven (7) to ten (10) days.
